

Greetings from the Training Department!

Just a brief word for our newest Providers: Welcome to Kansas Health Solutions. You have joined us at a very exciting, dynamic time!

There are a number of training requirements for our Providers per the PAHP contract and Federal regulations. Right now we have orientation to Provider Manual and ProviderConnect (our web-based billing system provided through our partner TMHC) available, along with Fraud and Abuse/Corporate Compliance and Cultural Competency. HIPAA training will be available on-line in April 2008.

All of these trainings can be accessed through our website at www.kansashealthsolutions.org. If you have any questions or problems regarding the trainings or accessing them on the website, please feel free to call us.

For anyone interested in face-to-face training on the Provider Manual, we will have three dates and locations listed on our website for the year of 2008. If you do not have Internet access, let us know and we will either get you registered for the live training or make arrangements for an alternative.

Again, welcome to the team!

Lorna Clarke
